

# Logbook Handheld Device (SVLHDS)

The logbook is a handheld device with a documentation platform that provides endoscopy departments with a tool to track the lifecycle of scope cleaning and storage. It helps healthcare organizations maintain accurate, up-to-date records for audits and streamlines documentation, improves operational efficiency, and ensures traceability. The platform features weekly activity reports, proactive maintenance alerts,

compliance-ready templates, and automated tracking of scope processing. Platform templates can be customized to follow an endoscopy suite's workflow and protocols. It integrates with the Ventaire drying and tracking system.

We recommend one handheld device for each scope technician.

- 5.5" touchscreen
- Charging station
- Button-activated barcode scanner
- 1-year warranty
- Compliance-ready workflow
- Cleaning process tracking
- Cleaning solution lot tracking
- Device maintenance schedules
- Scope repair history
- Real-time email alerts
