

Scope Drying Retrofit Kit for Cabinets with Single Scope Manager

Follow these instructions to install a scope drying unit inside an Evolve cabinet with adjustable scope managers, cord retainers, and AireCore construction.

Additional installation of filters, electrical components and connections, and training is provided onsite by a product representative. Call your local sales representative or Customer Service at 888-435-2256 for assistance.

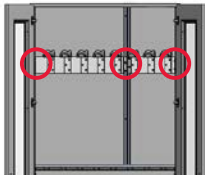

Tools needed:

- Drill with #2 Phillips bit or a Phillips screwdriver
- 9/64" Allen wrench
- Level

Attachment hardware included

Step 1

- Loosen, but don't remove, the 8 screws on the scope manager module.

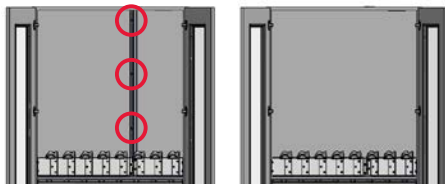

Step 2

- Slide the scope manager module down the center guide rail to the lowest position in the cabinet.

Step 3

- Remove the 3 mounting screws on the center guide rail and remove the rail.

Step 4

- Attach the retrofit guide rail to the top 2 holes in the cabinet with 2 screws.

Step 5

- Slide the scope manager module into place and tighten the 8 screws.

Step 6

- Use a level to ensure that the module height is even across the cabinet.

Continued on back

Step 7

- Remove the 5 screws from the underside of the cord retainer bracket and remove the cord retainer.

Step 8

- Attach the new cord retainer to the bracket using the 5 screws.

Step 9

- Position the pump $1\frac{1}{2}$ " from the upper left corner and $\frac{5}{8}$ " from the top of cabinet and attach using 4 wood screws.

Step 10

- Position the manifold a minimum of 14" from the bottom of the pump to the top of the manifold and attach to the 4 corners of the manifold with 4 wood screws.

Step 11

- Position the tubing management strip 17"-24" from the bottom of the top manifold to the tubing management strip. Attach the tubing management strip using 3 wood screws.
