InterConnect Lock System

Seamless security and smart control, wherever you are.

A secure, reliable lock system is essential for protecting your inventory. InterConnect locks safeguard the valuable content of your carts and cabinets with ease

Clear, Simple, and Built to Last

InterConnect's bright OLED screen ensures clear visibility from wider angles, while intuitive on-screen prompts make lock management effortless. The keypad is designed for easy input—even with gloved hands—and its durable, low-gloss texture resists scratches and cleaning damage. Plus, battery life is always visible, so you're never caught off guard.

Security That Never Forgets

InterConnect keeps contents protected, even if a cart or cabinet is left unlocked. A programmable auto-relock timer ensures it never stays open for too long.

Flexible Security, Your Way

Standard keypad locks can be upgraded to proximity locks for enhanced security. Users can access them via badge swipe, PIN, or both. Additionally, they're compatible with all RFID card formats.

Effortless Management,
Reliable Security

InterConnect's intuitive on-screen prompts simplify credential
and lock management with minimal training. Each facility can
store up to 3,000 users and administrator codes. Powered by
eight C batteries included, locks come with a one-year warranty.

Keep tabs all in one place

Monitor the security of your cart or cabinet fleet across your healthcare campus and satellite facilities with the InnerSpace Cloud platform and InterConnect Lock Plus to remotely manage users, view access reports, and receive notifications.

PACU/NICU – Floor 4A

Pharmacy – Med Room

ICU – South Bldg., Room 1

Seamless Connectivity, Smarter Control

When linked to the InnerSpace Cloud platform, InterConnect becomes a WiFi-enabled lock system, allowing you to manage access remotely and eliminate manual programming. Uploading user lists simplifies setup across all carts and cabinets.

Email Alerts and Reporting

InterConnect Plus notifies you of **low battery power, network loss, or supply restock requests**. InnerSpace Cloud provides customized reports, tracking audit trails, user access attempts, and timestamps. Built on Amazon Web Services (AWS), it ensures security, reliability, and data privacy. InnerSpace Cloud services include device configuration and onsite and on-demand training.

InterConnect Lock System for Roam, Pace, and Evolve cabinet with hinged doors

- Keypad lock is standard but can be upgraded to proximity lock.

- InterConnect locks cannot be used on Evolve cabinets with rolltop doors, Roam stainless steel carts, Roam ERCP and ECP carts, Roam suture carts, and Ventaire Endoscopy System cabinets.
