
Manage the security of your cart fleet across your healthcare campus and satellite facilities with the Smart Solutions platform and InterConnect Lock Plus.

From one computer, you can manage cart users, view access reports, and receive maintenance notifications. And because the platform is cloud-based, the information goes with you; you can manage cart security without being hard-wired to a computer. The Smart Solutions platform is also a time saver. You no longer have to update lock information at each individual cart, giving you more time with staff and patients. You can also save time by uploading batches of lock user information.

With Smart Solutions, you can program security credentials for individual carts or the entire fleet, proactively facilitate cart maintenance and restocking, and receive alerts for low battery and network connection.

A downloadable audit report tracks cart access, alerts, and users. You can filter the report by individual users, carts, departments, and date and time. Data is retained in the event of a power outage and automatically uploads when power is restored. The audit trail captures up to 15,000 access attempts.

A Smart Solutions subscription is available to customers who purchase InnerSpace® Roam and Pace carts with InterConnect locks. Subscriptions can be purchased for a minimum of one year and up to five years.

Work smarter. Manage your cart fleet's security with the cloud-based Smart Solutions website. From one location rather than at each individual cart, you can access and update cart access and user security levels.
