

# Replacement Products

---

## Connector Kit Example

---

Support scope drying and storage processes, safety protocols, and reduce the chances (and time and expense) of reprocessing expired endoscopes with the scope drying and tracking cabinet and scope drying unit. The drying system meets the 2021 Multisociety Task Force Scope Storage and Drying Guidelines.

## Connector Kits

Single-use connectors attach an endoscope's suction and air water valve ports to the Ventaire system to effectively dry and vent scopes. The easy-to-attach connectors support infection prevention protocols and are compatible with major endoscope brands. The connectors have undergone ethylene oxide sterilization. Kits include 100 connectors.

To determine which connector kit is compatible with your endoscope brands, visit <https://innerspacehealthcare.com/Ventaire>.

### Compressor Tube Replacement

Manifold Tube

Manifold Auxiliary Water Tube

---

### Tubes

Compressor, manifold, and manifold auxiliary water tubes connect to components in the drying system of a scope drying and tracking cabinet or to the ports of a scope drying unit to effectively vent HEPA filtered air through endoscope channels. Manifold tubes are used with endoscopes that don't have water jet ports; manifold auxiliary water tubes are used with endoscopes with water jet ports. Tubes should be replaced every six months.

### Tubes for scope drying and tracking cabinet

#### Compressor tube replacement (SVCTAF)

Includes air filter, package of 1

#### Triple manifold tube (SVTMT1)

Package of 1

#### Manifold tube (SVMT1)

Package of 1

#### Manifold auxiliary water tube (SVWAT1)

Package of 1

### Tubes for scope drying unit

#### Triple manifold tube (SVTMT1)

Package of 1

#### Manifold tube (SVDMT1)

Package of 1

#### Manifold auxiliary water tube (SVDWAT1)

Package of 1

---

### Materials and Finishes

Compressor tube and air filter:

**Soft PVC tube and polypropylene filter**

Manifold and manifold auxiliary water tubes:

**Soft PVC**

## Replacement Products

Compressor Tube / Air Filter

HEPA Air Filter

HEPA Fan Filter

### Ventaire System HEPA Filters

The filter pushes HEPA filtered air through an endoscope. Compressor tube/air filters are used with scope drying and tracking cabinets; HEPA air filters are used with scope drying units. Replace filter every six months.

Scope drying and tracking cabinet

Replacement compressor tube/air filter: SVCTAF

(Package of 1)

Scope drying unit

Replacement HEPA air filter SVDUAF

(Package of 1)

### Materials and Finishes

Scope drying and tracking cabinet:

Compressor tube and air filter: Soft PVC tube and polypropylene filter

Scope drying unit:

Filter: Polypropylene

### HEPA Fan Filter

The HEPA filter is used in an InnerSpace® scope cabinet's fan unit.

Replace the filter every six months.

Package of 1 (SHEPFIL)

Package of 3 (SHEPFIL3)
