

Scope Pass-through Cabinets

Evolve Cabinets and Ventaire™ Endoscopy System

Evolve Cabinets and Ventaire Endoscopy System

For healthcare facilities that have clean and soiled areas separated by a wall, scope pass-through cabinets add convenience, support work processes, and eliminate the flow of contaminants that can occur when scopes are moved among multiple areas in endoscopy and sterile processing departments. Designated as clean zones, pass-through cabinets dry and store cleaned scopes in a visible, protected, and accessible environment.

InnerSpace now offers scope pass-through cabinets as part of its expanded offering of products for endoscopy departments. Pass-through cabinets are available for the Evolve and Ventaire product lines.

Both scope pass-through cabinets feature:

- 2 self-closing tempered glass doors
- Padded wall that protects scope optics
- Concealed hinges
- 4"-high toe kick, optional 6"-high toe kick
- Optional keyed lock for each door

Cabinets store five scopes up to 74¾" in length. They are available in stainless steel and AireCore, a proprietary nonporous construction that is resistant to moisture, bacterial growth, and corrosion.

Scope Pass-through Cabinet

The Evolve scope pass-through cabinet is available with an optional HEPA fan unit that provides positive-pressure air in the cabinet.

Scope Pass-through Drying and Tracking Cabinet

The scope pass-through drying and tracking cabinet continuously filters air into internal scope channels to thoroughly dry scopes and features timed drying and venting cycles. It works with all major endoscope brands.
